## **Tevron, LLC Provides Powerful Automated Solution for System BIOS Testing**

*Tevron's enterprise testing solutions can be used to automate the testing of PC BIOS.*

---

**Chelmsford, Massachusetts, February 25, 2002** – Tevron, LLC today announced support to its AcuTest® NI solution for testing all PC and Thin Client system BIOS. Through the use of Tevron's powerful, non-intrusive, automated testing solution, the overall functionality and compatibility of a machine's system BIOS can now be completely automated. By using this breakthrough non-intrusive technology, any PC can be accessed non-intrusively over IP thus enabling testing organizations to create intelligent, automated test scripts that simulate a real user testing any system BIOS. Anything a user can do manually, AcuTest NI can replicate via automation.

“Testing a PC without a base operating system is a challenging task. Through the use of AcuTest NI, test engineers can now take total control of the system under test. Creating test scripts that intelligently validate system BIOS entries, change system BIOS entries, and reboot the PC has finally become a simple and productive task. Until now, non-intrusive solutions have been extremely expensive, hardware intensive, and very difficult to deploy. AcuTest NI is user friendly, very flexible and can control several systems simultaneously over IP, all at an economical price”, explains Jay Labadini, President and CEO of Tevron, LLC.

Tevron's automated solutions support all system BIOS versions and all Windows environments including Windows 3.1, Windows 95, 98, NT, 2000, Millennium, and XP. In addition, Tevron's automated solutions also support ALL browsers, including AOL, Microsoft, Netscape, RealOne as well as ALL development environments including Java, Siebel, PeopleSoft, Tevron, LLC 6 Courthouse Lane, Unit #7 Chelmsford, MA 01824 Tel: 978.441.9844 Fax: 978.441.9877 [www.tevron.com](http://www.tevron.com)

Lotus Notes, Oracle, SAP, WebLogic, WebSphere, .NET, Streaming Media, to name just a few.
