Tevron® APM & Testing Solutions Fully Support all Cloud Computing Environments

CitraTest, CitraTest VU, and CitraTest APM are the only single license, integrated solutions for conducting application performance monitoring, functional, regression and latency testing for every Cloud Computing Environment.

Nashua, New Hampshire, January 3, 2011 – Tevron today announced the addition of support for all Cloud Computing applications & environments to its suite of APM & Testing solutions. Cloud Computing is a natural evolution of the widespread adoption of virtualization, Service-oriented architecture and utility computing. These environments include Cloud offerings from Amazon, Rackspace, Salesforce, Microsoft, Google, VMWare, NetApp and Citrix Systems. With the latest releases of CitraTest, CitraTest APM, and CitraTest VU, Tevron again is taking the lead role in the APM & testing industry in providing support for every Cloud Computing applications & environments. As enterprises move toward Cloud Based Computing, Tevron’s APM & testing solutions will continue to offer the industry lead for application monitoring, load testing, and general automation for those critical deployments. “Assessing quality of service and measuring / enforcing service level agreements (SLAs) are critical requirements for every enterprise Cloud Computing deployment. Tevron’s solutions deliver this capability and more to ensure a quality & productive user experience,” says Jay Labadini, Vice President.
