**CitraTest® VU, the world's first load testing solution developed specifically for Terminal Server and Citrix® hosted applications.**

*CitraTest® VU is the only load testing solution for creating real user load activity for Terminal Server and Citrix hosted applications.*

---

**Chelmsford, Massachusetts, January 8, 2003** – Tevron®, LLC today announced version 3.1 of CitraTest® VU, a revolutionary and cost effective load testing solution designed specifically for Terminal Server and Citrix enterprise users. Because CitraTest® VU actually replicates real users, you are assured of the overall application response times based on real user loads. Before your application goes live, you now will be sure of the maximum number of users that can be realistically supported through the use of CitraTest VU.

CitraTest® VU replicates several hundred virtual human users on load generating machines. Through intelligent script logic, CitraTest® VU directly interacts with the target application like a real user would by dynamically analyzing the video output for uniquely defined images (i.e. menu items, buttons, icons, windows, etc.), issuing keyboard output, and issuing mouse activity. Any activity a user can do can be automated and replicated.

“Because of the unmatched testing accuracy provided by CitraTest® VU, for the first time, the enterprise, ISVs and ASPs can effectively replicate real user loads before going live, allowing them to perform to service level agreements with much greater confidence. Until now, there has been no automated fashion of creating intelligent, real client-side user loads for the Terminal Server and Citrix environment. This is truly an industry first and fills a major void within the server based computing community”, explains Richard Byrne, CTO of Tevron, LLC.

To learn how CitraTest® VU can improve the testing of your Terminal Server or Citrix hosted applications, call 1.978.441.9844 or visit [www.tevron.com](http://www.tevron.com).

## **ABOUT TEVRON, LLC**

Tevron, LLC is a pioneer in a new class of automated software testing solutions. Utilizing Tevron's proprietary Image Verification as a platform for its automated solutions, Tevron's mission is to provide automation solutions compatible with all operating systems, development environments and multiple hardware platforms. Tevron offers test automation solutions in both standalone software versions and totally non-invasive external appliance aided versions, as well as offering expert implementation and testing services.

## **TRADEMARKS**

Tevron, LLC, the Tevron logo, CitraTest, and CitraTest VU are registered trademarks of Tevron, LLC. All other product references herein are either trademarks or registered trademarks of their respective owners.
