Tevron® Solutions Fully Support Windows Presentation Foundation (www.microsoft.com).

CitraTest, CitraTest VU, and CitraTest APM are the only single license, integrated solutions for conducting application performance monitoring, functional, regression and latency testing for every enterprise application that is accessible from a Windows based machine.

Nashua, New Hampshire, June 23, 2011 – Tevron today announced the addition of support for Microsoft Windows Presentation Foundation (WPF) to its suite of APM & Testing solutions. Windows Presentation Foundation, WPF, provides a unified framework for building applications and high-fidelity experiences in Windows that blend application UI, documents, and media content. WPF offers developers 2D and 3D graphics support, hardware-accelerated effects, scalability to different form factors, interactive data visualization, Windows 7 features including multi-touch, and superior content readability. With the latest releases of CitraTest, CitraTest APM, and CitraTest VU, Tevron again is taking the lead role in the APM & testing industry in providing support for every WPF application. As IT organization move towards WPF to create next generation user experiences, Tevron's APM & testing solutions will continue to offer the industry lead for application monitoring, load testing, and general automation for those critical deployments. To learn more about Tevron's automated testing & monitoring solutions or to request additional information, please call +1.702.518.7435, email sales@tevron.com or visit http://www.tevron.com.
