Tevron® Releases v7.2 of CitraTest APM & the CitraTest APM Real-Time Web Console with support for Every Application & Every Business Process.

Tevron offers the ONLY testing & End to End monitoring solutions that fully support EVERY enterprise application that is accessible from a Windows based machine. No application is left behind.

Nashua, New Hampshire, November 13, 2008 – Tevron, the global leader in APM and testing solutions, today announced the release of version 7.2 of CitraTest APM & the CitraTest APM Real-Time Web Console. This solution delivers unmatched proactive monitoring, transaction monitoring, real-time alerting, real-time monitoring, application availability, application performance, IT Service Management, Business Service Management (BSM), and SLM. Every environment, every business process, and every application is supported. Compared to the legacy management products available on the market, this solution is more scalable, more flexible, support all environments with a single technology, more cost effective, and easier to maintain and deploy.

“Through the use of Tevron’s APM Solutions, IT Managers can better manage and enhance the overall customer experience in regard to application performance and availability. As a result, Business Managers get an IT environment that is aligned with the business along with increased IT efficiency and profitability,” says Jay Labadini, Vice President.

To learn more about Tevron’s APM & Testing solutions, to request additional information, or to schedule a demonstration please call +1.702.518.7435 or visit <http://www.tevron.com>.
