Tevron® Introduces Comprehensive End-To-End Monitoring for all VMware® Environments.

Tevron® Introduces Comprehensive End-To-End Monitoring for all VMware® Environments.

Nashua, New Hampshire, November 28, 2007 – Tevron®, a global provider of testing & business service monitoring solutions, today announced the support for VMware for its flagship monitoring solution, CitraTest® APM. Through the deployment of Tevron’s APM solutions for virtual computing environments, every application across the enterprise can be accurately measured and actively monitored when hosted via VMware® allowing for the enforcement of all Service Level Agreements (SLAs) on both virtual hosts as well as virtual guests. “Because Tevron’s APM solutions are completely independent of the application they are monitoring, for the first time, every application across the enterprise can be monitored with one cost effective solution, including all virtual environments. Every organization has numerous applications they need to monitor and our APM solutions can monitor them all. No other vendor offers such vast and all encompassing support. The days in which organizations have to pay a licensing fee for each application and each protocol they need to monitor are over potentially resulting in the savings of millions of dollars in licensing and maintenance fees. Through the use of Tevron’s APM solutions, organizations now have one all encompassing solution with one licensing fee that can monitor any and every application across the enterprise. This includes all legacy applications, client server applications, web applications, Citrix or Terminal

Server hosted applications, VMware hosted applications, terminal emulation...every application.

With the introduction of virtual computing support, Tevron continues to provide its customers with secure and flexible solutions. This flexibility is a must to meet the demanding needs of today's global enterprises", explains Jay Labadini, Vice President at Tevron.

To learn how CitraTest® APM can assist you with your APM & monitoring requirements, call 1.702.518.7435 or visit www.tevron.com.
