Tevron® Adds Full Support for Microsoft Systems Center 2012 to its Flagship Application Monitoring Solution, CitraTest® APM.

CitraTest APM is the only monitoring solution that fully supports every enterprise application that is accessible from a Windows based machine.

Nashua, New Hampshire, October 30, 2013 – Tevron today announced the addition of support for Microsoft Systems Center 2012 to its flagship Application Monitoring solution, CitraTest APM. CitraTest APM along with System Center 2012 provide best of breed end-to-end service management for all Microsoft Windows® applications and applications that are accessible from Microsoft Windows®, helping you increase efficiency and achieve greater control over your IT environment. System Center 2012 delivers unified management across on-premises, service provider, and Windows Azure environments, thereby enabling the Microsoft Cloud OS. System Center 2012 offers exciting new features and enhancements across infrastructure provisioning, infrastructure monitoring, application performance monitoring, automation and self-service, and IT service management. With the latest release of CitraTest® APM, Tevron again is taking the lead role in Application Monitoring by providing testing & monitoring solutions with an open architecture that allow for the easy integration with third party solutions with full support for every application that is accessible from Windows. “According to analysts, 70% of current IT budgets are spent maintaining existing projects and IT services vs. adding new business value. Through the use of CitraTest APM along with Systems Center 2012, Tevron’s enterprise customers will spend less time dealing with crisis issues, and fighting costly fires and more time delivering

efficiencies and new services to their customers, further adding value to their business,” says Jay Labadini, Vice President.
