

A leading retail department chain based in the USA, deploys CitraTest APM for its real-time, active application monitoring requirements

Topic: Application Monitoring – Retail Sector

Nashua, NH. USA – May 24, 2017 – Tevron, the leader in IT performance and end to end monitoring & testing solutions, today announced that a leading retail department chain deployed CitraTest (<https://tevron.com/test-automation-citratest.aspx>) for their real-time, active application monitoring requirements. The company operates 40-plus stores that anchor malls. The stores sell men's, women's, and children's apparel, shoes, and accessories, as well as jewelry, cosmetics, housewares, appliances, and sporting goods. Some house optical centers and travel agencies, and also provide catering and appliance repair services. They also offer an online store.

"Organizations that manage several different application environments ranging from client/server, web, mobile, cloud, and virtualization typically require multiple types of monitoring products from multiple vendors. Through the use of our powerful & unique technology, every application hosted via Windows can be actively monitored on an ongoing basis with one solution, one investment." – **Jay Labadini, VP of Tevron.**

Through the use of CitraTest APM, ongoing response times are measured, application availability is tracked, and end user SLAs are recorded. Find and resolve performance problems before users are impacted. Validate SLAs contracts with internal/external customers. Eliminate complexity and increase IT operational efficiency
