

Leading US based Healthcare company deploys CitraTest APM for its End-To-End Monitoring & Testing Requirements

Topic: End to End Application Monitoring for every application with CitraTest APM

Nashua, NH. USA – January 25, 2017 – Tevron, the leader in IT performance and end to end monitoring & testing solutions, today announced that a leading US healthcare company which serves over 3 million people deployed CitraTest APM (<http://tevron.com/application-performance-monitoring-citratest-apm.aspx>) for their end to end performance & availability monitoring requirements & automated testing requirements. The company deploys a wide range of healthcare solutions and services to its customers. These applications & environments include Epic, Cerner, Citrix, Cloud, Web, and legacy systems to name a few.

"Organizations that manage several different application environments ranging from client/server, web, mobile, cloud, and virtualization typically require multiple types of monitoring products from multiple vendors. Through the use of our powerful & unique technology, every application hosted via Windows can be actively monitored on an ongoing basis with one solution, one investment." – **Jay Labadini, VP of Tevron.**

Through the use of CitraTest APM, ongoing response times are measured, application availability is tracked, and end user SLAs are recorded. Find and resolve performance problems before users are impacted. Validate SLAs contracts with internal/external customers. Eliminate complexity and increase IT operational efficiency
