**Tevron® Adds Full Support for Microsoft® Windows Vista® (formerly code named Longhorn) to the CitraTest® Family of Automated Testing Solutions for APM, Load testing, and General Automation.**

*CitraTest, CitraTest VU, and CitraTest APM are the only single license, integrated solutions for conducting application performance monitoring, functional, regression and latency testing for every enterprise application that is accessible from a Windows based machine.*

---

**Nashua, New Hampshire, September 15, 2005** – Tevron today announced the addition of support for Microsoft Windows Vista (formerly code named Longhorn) to its suite of automated testing solutions. With the latest release of CitraTest®, CitraTest® APM, and CitraTest® VU, Tevron again is taking the lead role in the automated testing industry in providing support for every Windows environment and every application that is accessible from Windows. As companies across the world upgrade to the new Vista operating environment, Tevron’s automated testing solutions will continue to offer the industry lead for application monitoring, load testing, and general automation.

To learn more about Tevron’s automated testing solutions or to request additional information, please call +1.702.518.7435 or visit <http://www.tevron.com>.
