**CitraTest™ VU, the world's first load testing solution developed specifically for Citrix® hosted applications.**

*CitraTest VU is the only load testing solution for creating real user load activity for Citrix hosted applications.*

---

**Chelmsford, Massachusetts, September 17, 2001** – Tevron, LLC today announced version 2.0 of CitraTest VU, a revolutionary new load testing solution designed specifically for Citrix enterprise users, ASPs, ISVs and iBusiness. Because CitraTest VU is a virtually non-invasive testing solution, users are assured quality and accuracy, saving time, money, resources, and ensuring their ability to compete.

CitraTest VU simulates up to 200 virtual human users on a single load machine. CitraTest VU interacts with the target application by issuing standard keyboard and mouse events directly to the Citrix hosted application from within the ICA Client in accordance with user defined test script logic.

“Because of the unmatched testing accuracy provided by CitraTest VU, for the first time, the enterprise, ISVs and ASPs can effectively replicate real user loads before going live, allowing them to perform to service level agreements with much greater confidence. Until now, there has been no automated fashion of creating client-side user loads for the Citrix environment. This is truly an industry first and fills a void within the Citrix community”, explains Richard Byrne, CTO of Tevron, LLC.

CitraTest VU can simulate users running Windows 3.1, Windows 95, 98, NT, 2000, Millenium, and Linux. CitraTest VU operates with all browsers, including AOL, Microsoft, Netscape, etc. In fact, using only one DLL, CitraTest is so non-invasive that its accuracy is unmatched.

To learn how CitraTest VU can improve the testing of your Citrix hosted application, call 1.978.441.9844 or visit [www.tevron.com](http://www.tevron.com).

## **ABOUT TEVRON, LLC**

Tevron, LLC is a pioneer in a new class of automated software testing solutions. Utilizing Tevron's proprietary Image Verification as a platform for its automated solutions, Tevron's mission is to provide automation solutions compatible with all operating systems, development environments and multiple hardware platforms. Tevron offers test automation solutions in both standalone software versions and totally non-invasive external appliance aided versions, as well as offering expert implementation and testing services.
