## **Tevron Control Center™, Controlling Automated Test Scripts over IP**

*Test Any Application, Anytime, Anywhere.*

---

**Chelmsford, Massachusetts, April 2, 2002** – Tevron, LLC today announced version 1.2 of the Tevron Control Center, a revolutionary solution that enables organizations to control their automated test scripts over IP. Through the use of the Control Center, test engineers can now deploy their AcuTest ®™ and CitraTest ®™ test scripts anywhere across the global enterprise over IP thus allowing for the sharing of corporate resources and simplifying the process of continuous application monitoring, functional testing, and load testing.

“For global organizations that must test applications at different geographical locations across the enterprise, the Tevron Control Center will enable them to effectively monitor and test applications anywhere in the world from one central location eliminating the need for redundant testing resources. In addition, automated scripts that simulate real world, real user activity can be quickly replicated and executed across the enterprise in a moments notice. Whether it is a few PCs or several hundred PCs, they all can be controlled remotely in a real time, automated fashion. Test any application, anytime, anywhere”, explains Richard Byrne, CTO of Tevron, LLC.

Tevron’s automated solutions support all Windows environments including Windows 3.1, Windows 95, 98, NT, 2000, Millennium, and XP. In addition, Tevron’s automated solutions also support ALL browsers, including AOL, Microsoft, Netscape, RealOne as well as ALL development environments including Java, Siebel, PeopleSoft, Lotus Notes, Oracle, SAP, WebLogic, WebSphere, .NET, Streaming Media, to name just a few.

To learn how Tevron can improve the testing of your enterprise applications, call
