Tevron® Releases Real-Time Dashboard for its Testing & Monitoring Solutions.

Tevron offers the only testing & monitoring solutions that fully support every enterprise application that is accessible from a Windows based machine.

Nashua, New Hampshire, January 17, 2007 – Tevron today announced the release of the Real-Time Dashboard for its Monitoring & Testing solutions. The Real-Time Dashboard enables IT Managers to actively view the performance and availability of every application across the enterprise. Other features include management level reporting, daily distribution of application performance and availability metrics, and alerting to name a few.

“Through the use of the Real-Time Dashboard and CitraTest APM, IT Administrators can better monitor access and performance and cost effectively run IT in alignment with company objectives. As a result, Business Managers get an IT environment that is aligned with the business along with increased IT efficiency and profitability,” says Jay Labadini, Vice President.

To learn more about Tevron’s APM & Testing solutions, to request additional information, or to schedule a demonstration please call +1.702.518.7435 or visit <http://www.tevron.com>.
