## **Tevron, LLC Provides Powerful Testing Solution for Streaming Media Applications**

*Tevron's enterprise testing solutions can be used prior to deployment of streaming media applications to ensure functionality, compatibility, and measure performance.*

---

**Chelmsford, Massachusetts, March 11, 2002** – Tevron, LLC today introduced support to its AcuTest and CitraTest solutions for testing streaming media applications. Through the use of Tevron's powerful testing solutions, the overall functionality and compatibility of streaming media applications can be thoroughly and accurately tested. In addition, scripts can be created that continuously monitor these applications to ensure availability and overall performance. By recording and replaying verification of the actual video streams using RealOne Player or Windows Media Player, testing teams can validate that users can access and record any video stream and automatically validate that it was replayed correctly. AcuTest and CitraTest verify the video content of the stream during playback ensuring proper functionality as seen by the end user.

“Streaming media has rapidly become an integral part of e-business. Through the use of Tevron's unique streaming media testing technology, testing teams and developers can effectively validate the actual video content of any video stream during playback of that stream. In addition to delivering the technology to perform functional testing of streaming media applications, Tevron's enterprise testing solutions can also monitor these applications 24x7. For Tevron, this is yet another industry first in the automated testing space”, explains Jay Labadini, President and CEO of Tevron, LLC.

To learn how Tevron can improve the testing of your streaming media applications, call 1.978.441.9844 or visit [www.tevron.com](http://www.tevron.com).

## **ABOUT TEVRON, LLC**

Tevron, LLC is a pioneer in a new class of automated software testing solutions. Utilizing Tevron's proprietary Image Verification as a platform for its automated solutions, Tevron's mission is to provide automation solutions compatible with all operating systems, development environments and multiple hardware platforms. Tevron offers test automation solutions in both standalone software versions and totally non-invasive external appliance aided versions, as well as offering expert implementation and testing services.
