**CitraTest™, the world's first automated testing solution developed just for Citrix® hosted applications.**

*CitraTest is the only software test automation solution for conducting performance benchmarking, compatibility, functional and latency testing for Citrix hosted applications.*

---

**Chelmsford, Massachusetts, May 15, 2001** – Tevron, LLC today announced version 2.1 of CitraTest, a revolutionary new automated testing solution designed specifically for Citrix enterprise users, ASPs, ISVs and iBusiness. Because CitraTest is a virtually non-invasive testing solution, users are assured quality and accuracy, saving time, money, resources, and ensuring their ability to compete.

CitraTest acts as a virtual human user by recognizing and evaluating the targeted Citrix application's response during test script playback by comparing the application's display to images stored in a user-created baseline. CitraTest interacts with the target application by issuing standard keyboard and mouse events to the system under test (SUT) in accordance with user defined test script logic. CitraTest's Interactive Recorder automatically creates sophisticated Microsoft Visual Basic script code as each test script is created. CitraTest includes a recording interface that stores the onscreen control images, along with the user's keyboard and mouse actions in a self-contained test script that is ready for immediate playback. CitraTest's Summary Results Log immediately details each executed test step, when it was performed, and the elapsed time of its completion.

“Because of the unmatched testing accuracy provided by CitraTest, for the first time, the enterprise, ISVs and ASPs can perform to service level agreements with much greater confidence,” explains Jay Labadini, President and CEO of Tevron, LLC.

CitraTest is compatible with Windows 95, 98, NT, 2000 and Millenium and does not in any way modify the operating system of the system under test (SUT). CitraTest operates with all browsers, including AOL, Microsoft, Netscape, etc. In fact, using only one DLL, CitraTest is so non-invasive that its accuracy is unmatched.

In addition to supporting all Windows development environments and all browsers, CitraTest integrates non-simulated, real multi-user benchmarking, performance monitoring, and latency testing with the same functional and regression testing solution. CitraTest is the single solution. CitraTest offers better accuracy, better resource management, better time to market and better economic advantage.

To learn how CitraTest can improve the testing of your Citrix hosted application, call 1.978.441.9844 or visit [www.tevron.com](http://www.tevron.com).

## **ABOUT TEVRON, LLC**

Tevron, LLC is a pioneer in a new class of automated software testing solutions. Utilizing Tevron’s proprietary Image Verification as a platform for its automated solutions, Tevron’s mission is to provide automation solutions compatible with all operating systems, development environments and multiple hardware platforms. Tevron offers test automation solutions in both standalone software versions and totally non-invasive external appliance aided versions, as well as offering expert implementation and testing services.

## **TRADEMARKS**
