Tevron® Introduces Secure & Parallel Monitoring for all Citrix Hosted Applications

Tevron® Introduces Secure & Parallel Monitoring for all Citrix Hosted Applications

Nashua, New Hampshire, October 2, 2006 – Tevron® today announced further enhanced support

for the monitoring of all Citrix hosted applications to its flagship solution, CitraTest APM.

Tevron's latest leading edge technology now allows for the simultaneous execution of Citrix transactions on a single monitoring PC. These "Real User Transactions" are securely executed in the Windows service space and actively measure the End-To-End User Experience.

Through the deployment of Tevron's APM solutions, every application across the enterprise can be accurately measured and actively monitored allowing for the enforcement of all SLAs. By providing the ability to perform "Secure-Parallel Monitoring", now a single monitoring machine can remain in a "logged off" state from a specific point of presence in the enterprise and execute and measure real-world user transactions concurrently ensuring security and further expanding the overall coverage bandwidth.

"Because Tevron's APM solutions are completely independent of the application they are monitoring, for the first time, every application across the enterprise can be monitored with one cost effective solution. Every organization has numerous applications they need to monitor and our APM solutions can monitor them all. No other vendor offers such vast and all encompassing support.. Through the use of Tevron's APM solutions, organizations now have one all encompassing solution with one licensing fee that can monitor any and every application across

the enterprise. This includes all legacy applications, client server applications, web applications, Citrix or Terminal Server hosted applications, terminal emulation...every application. With the introduction of “Secure-Parallel Monitoring” support, Tevron continues to provide its customers with secure and flexible solutions. This flexibility is a must to meet the demanding needs of today’s global enterprises”, explains Jay Labadini, Executive Vice President at Tevron.

To learn how CitraTest APM® can assist you with the End-To-End performance management for all

your applications, call 1.702.518.7435 or visit www.tevron.com.
