Tevron Announces Full Support for Microsoft <u>Internet Explorer 8</u> for its flagship End-To-End Monitoring & Testing Solutions.

Tevron Announces Full Support for Microsoft Internet Explorer 8 for its flagship End-To-End Monitoring & Testing Solutions.

Nashua, New Hampshire, May 29, 2009 – Tevron, a global provider of Testing, APM & business service monitoring solutions, today announced the continued & expanded support for the comprehensive End-To-End Monitoring for all applications accessed via Microsoft Internet Explore 8 for its flagship monitoring solution, CitraTest® APM. Internet Explorer 8 includes the latest protections against a range of security and privacy threats on the Internet, tools and resources to plan a deployment of Internet Explorer 8, new features to help users complete browsing tasks more quickly and easily (http://technet.microsoft.com/en-us/ie/cc889349.aspx). Through the deployment of Tevron's APM solutions for all environments, every application across the enterprise, including applications accessed via IE 8, can be accurately measured and actively monitored. Further, Tevron's unique technology will deliver the ability to enforce all Service Level Agreements (SLAs) for any application deployed via any browser technology. "Because Tevron's APM solutions are completely independent of the application they are monitoring and how that application is delivered, for the first time, every application across the enterprise can be monitored with one cost effective solution, including all web browser environments. Every organization has numerous applications

they need to monitor and our APM solutions can monitor them all. No other vendor offers such vast and all encompassing support. The days in which organizations have to pay a licensing fee for each application, each protocol they need to monitor, and each methodology of application delivery are over. This will result in the potential savings of millions of dollars in licensing and maintenance fees. Through the use of Tevron's APM solutions, organizations now have <u>one</u> all encompassing solution with <u>one</u> licensing fee that can monitor any and every application across the enterprise. This includes all legacy applications, client server applications, all web browsers, Citrix or Terminal Server hosted applications, XenServer, XenApp, XenDesktop, VMware hosted applications, terminal emulation...every application. This flexibility is a must to meet the demanding needs of today's global enterprises", explains Jay Labadini, Vice President at Tevron.

To learn how CitraTest® APM can assist you with your APM & monitoring requirements, call 1.603.595.9301 or visit www.tevron.com.
